SUMMER SCHOOL

SURGICAL SKILLS AND RESEARCH

03rd – 07th July 2023

The Summer School “Surgical Skills & Research” of the PMU Salzburg and the University Hospital department of general surgery is aimed at students and young doctors who are considering a career in a surgical field and would like to acquire basic surgical techniques.

The aim of the course is to combine traditional instruction with hands-on and simulation and a comprehensive training of basic surgical skills. There is also an introduction to clinical research with practical tips and tricks. Basic ethical and legal knowledge is imparted, as well as practical know-how for academic self-studies or industrial studies.

All participants will receive a GCP certificate (Good Clinical Practice) and templates for study documents (e. g. study protocol, patient information, ...).

Experienced tutors enable participants to learn and practice in a relaxed and friendly environment. Various training facilities for laparoscopic surgery are available on site, ranging from simulation-based training and 3D trainer boxes to the use of virtual reality.

In order to improve and consolidate the experience gained, the use of medical devices is partly tested on animal tissue.

COSTS

€ 166,50 per person (VAT included)
